GLORIA EMEKA

FRONTEND DEVELOPER | REACT • TYPESCRIPT • NEXT.JS

Abuja, Nigeria | 07036630817 | glowemeka@gmail.com | LinkedIn: gloria-emeka | GitHub: Gloweeyahh | Portfolio: gloria.work.netlify.app

PROFESSIONAL SUMMARY

Frontend developer with 3+ years of web development experience and 2+ years working with React, building responsive, user-focused websites and web applications with TypeScript, JavaScript, Next.js, Vite and Tailwind CSS. Experienced in integrating REST APIs, forms, authentication and payment-related workflows; debugging UI and integration issues; and deploying and maintaining live websites. Brings attention to accessibility, mobile usability, SEO and clear user flows.

CORE TECHNICAL SKILLS

Frontend Development: React, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Vite, responsive layouts, reusable components, cross-browser compatibility

Interface Quality: Mobile-first design, semantic HTML, accessibility fundamentals, Figma, usability, SEO fundamentals, Core Web Vitals, Lighthouse, image optimisation

APIs & User Flows: REST APIs, JSON, Fetch/Axios, asynchronous JavaScript, forms, authentication, OAuth, webhooks, payment-service integrations, Resend

Tools & Delivery: Git, GitHub, browser DevTools, debugging, API testing, MongoDB, MySQL, Firebase, Supabase, Netlify, Vercel, Render, deployment and maintenance

Engineering Practices: Requirements interpretation, technical documentation, iterative delivery, troubleshooting, testing, code organisation and version control

AI-Assisted Development: Experience using AI coding tools and prompt engineering, with manual review and testing of generated code.

PROFESSIONAL EXPERIENCE

Web Developer — Peace for Humanity Foundation | July 2025 – February 2026

- • Developed and maintained the organisation’s public-facing website, delivering responsive interfaces, CMS workflows, contact forms and email functionality.
- • Translated organisational needs into clear page structures and user flows, with attention to mobile responsiveness, usability, accessibility and visual consistency.
- • Improved technical SEO through semantic HTML, metadata, sitemap configuration, structured data, internal linking and image optimisation.
- • Managed hosting, domain configuration, deployment, analytics and Google Search Console to support ongoing monitoring and maintenance.
- • Increased Google Search impressions from 30 to 456 within two months; the site also recorded 460+ page views, approximately 15 leads and 6 enquiries during the same period.

Freelance Web Developer — Independent | August 2024 – Present

- • Built and maintained approximately 15 websites across client, freelance and independent projects, including six substantially independently developed projects and three paid website engagements.

• Built responsive interfaces using React, Next.js, TypeScript, JavaScript, Tailwind CSS and Bootstrap, with attention to mobile behaviour and clear user journeys.

• Integrated REST APIs, authentication, payment services, webhooks, email services, databases and third-party tools according to project requirements.

• Delivered work across requirements review, UI implementation, debugging, deployment, revisions and ongoing website maintenance.

• Used Git/GitHub, browser DevTools and deployment platforms to track changes, investigate issues and maintain working web experiences.

Graphics Designer — Steelbase Resources Limited | February 2019 – December 2021

• Created brand assets and marketing materials, building a foundation in visual hierarchy, typography, spacing and consistent presentation.

• Worked from briefs and feedback to refine designs and deliver materials aligned with business requirements.

• Applied design principles to frontend work, particularly layout, visual consistency and user-facing communication.

SELECTED PROJECTS

DAG SaaS Application Live project

Stack: Next.js, React, TypeScript, Tailwind CSS, JavaScript, Node.js, MongoDB, MySQL, authentication, OAuth, webhooks, payment verification, document uploads, GitHub Actions, Netlify, Render

• Built a SaaS application with authentication, dashboards, persistent login state, payment-related functionality, document uploads and deployment workflows.

Digital Ascension Group Onboarding Platform Live project

Stack: React, JavaScript, TypeScript, responsive UI, API integrations, payment-related workflows, webhooks, Resend, Git/GitHub, Netlify

• Developed an onboarding-focused web experience with responsive layouts, form workflows and payment-related integrations.

Booking Platform Live project

Stack: React, JavaScript, responsive UI, forms, deployment

• Built a responsive booking interface with clear navigation and structured form interactions.

Memorial & Tribute Forms Live project

Stack: React, JavaScript, forms, responsive design, deployment

• Built form-based memorial and tribute experiences focused on straightforward data entry and mobile usability.

EDUCATION

• Miva Open University — Master of Public Health, expected April 2027

• University of Abuja — B.Sc. Biological Sciences, Second Class Upper, 2023

CERTIFICATIONS & LEADERSHIP

• Bizmarrow Technologies — Web Design, 2024

• Google — Digital Marketing, 2024

• Dasaba and Sons — Graphic Design

- SMEDAN — Entrepreneurship Training
- Digital Onboarders / DL4ALL — Certificate of Meritorious Service; served as mentor and technology adviser
- Open-source contributor — First Contributions, pull request #116623
